shironigun.github.io

Business analyst and associate product owner on enterprise dealership SaaS. I define and prototype AI features, run the sprint as Scrum Master and lead the QA team. I build working software by directing AI agents, and the tools I build wait for a person's approval before they write.

## Experience

### Product Quality Analyst

Jan 2026 – Present

Contour Software, Perseus Group (Constellation Software)

- **AI product ownership.** Lead AI feature definition for the most successful product in a 200+ person division: customer-engagement SaaS for automotive, agricultural and equipment dealerships. Took Promise Tracker, an AI feature that surfaces what a dealership still owes its customers, from concept to production readiness. Promoted from Junior SQA Analyst in under two years.
- **AI-native product revamp.** Led the rebuild of 7 product areas of our dealership CRM, directing Claude Code agents from specification to review against the component library and business rules.
- **Roadmap and product strategy.** Shape the roadmap and AI feature decisions with the Product Owner and Initiative Manager in Aha! and Azure DevOps, backing priorities with quantitative analysis (regression, trend and break-even), SWOT and 5 Whys.
- **AI enablement at scale.** Organised the AI Foundations hackathon for 9 participants across QA and design, with 9 working demos; opened it with “AI Foundations: From Doing to Directing” and wrote a 183-page handbook on working with Claude.
- **Public AI tooling.** Published a public Claude Code marketplace of 7 plugins and 30 skills, with a person approving every write, and built the AI QA Workbench, which I took to the DIS AI Foundations program and extended there.
- **Delivery and insight.** Own release readiness, introduced the API automation framework and onboarded 3 analysts; set up Power BI and Power Platform dashboards tracking release cadence, change failure rate and post-launch outcomes.
- **Recognition.** Certificate of Appreciation for organising and delivering the AI Foundations initiative; Certificate of Completion, AI Foundations: From Developer to Orchestrator (Dealer Information Systems).

### Junior SQA Analyst

Feb 2024 – Dec 2025

Contour Software, Perseus Group (Constellation Software)

- **Division-wide quality framework.** Designed the Strict Quality Gates framework, adopted by 3 other teams: about 40% less defect leakage and zero critical defects across 6 consecutive sprints.
- **Delivery under pressure.** Took over QA of a critical release mid-cycle, without a handover, and shipped it on time; covered a 3-month BA vacancy, owning requirements with the Product Owner, with no gap in delivery.
- **Domain enablement.** Delivered 3,900+ hours of domain training, the most comprehensive programme in the division's history, contributed to the public product knowledge base through training and knowledge transfer, and trained 2 non-technical hires to independent sprint work within their first quarter.
- **Design and tooling standards.** Led the design phase for the dealership mobile app with the UX designer, and ran the Postman proof of concept that made Postman the standard API testing tool across 5+ teams.
- **AI hackathon winner.** 1st of 11 teams in a division-wide AI hackathon (2025) as Product Owner, Scrum Master and QA lead, building AI for customer retention and employee performance; delivered the final pitch.

### SQA Trainee

Dec 2023 – Feb 2024

Contour Software

- **Standards from day one.** Initiated and wrote the organisation's first global UI standards document, covering component consistency, interaction patterns and accessibility baselines.
- **Domain immersion.** Spent 370+ hours with the Product Owner, Initiative Manager, development and operations, and ran acceptance, functional, API and cross-platform testing with workarounds that cut regression effort.

### WordPress Designer

Sep 2022 – Mar 2023

Media Solutions

- **Client websites.** Designed and built custom WordPress websites from client brand requirements, turning PSD designs into pixel-accurate, responsive Elementor builds.
- **UX improvements.** Improved navigation, layout hierarchy and UI consistency across every site I delivered.

### UX Designer, intern

Oct 2021 – Dec 2021

Arfa Software Technology Park

- **Interface design.** Refined the organisation's web interface for clearer navigation and hierarchy, and sketched and prototyped UI concepts for stakeholder review before engineering started.
- **Brand materials.** Designed e-brochures and client-facing materials to brand guidelines.

## Recognition

VP Award
Contributions tied to multimillion-dollar business goals

AI Innovator of the Month

1st of 11 teams, AI hackathon
As Product Owner, Scrum Master and QA lead

Division All-Hands Recognition

Annual Special Thanks

## Skills

**Product and analysis**
Product discovery and definition, User stories and acceptance criteria, Stakeholder management (RACI/RASCI), Process modelling, Roadmapping

**AI product work**
AI feature design, AI skill writing and refinement, Evaluating AI output, Agentic workflows, Prototyping with AI

**Quality**
Test strategy and planning, Functional, API and acceptance testing, Quality gates, Release readiness, Defect management

**Ways of working**
Scrum (CSM®), Kanban, Workshop facilitation, Root-cause analysis (5 Whys), Risk and escalation management

## Tools

**Product**
Azure DevOps, Jira, Aha!, draw.io

**Design**
Figma Make, Claude Design, Claude Motion

**AI and agentic development**
Claude Code, Claude Skills and Plugins, Claude Artifacts, MCP servers

**Testing**
Playwright, Selenium, Postman, TestRail, Burp Suite

## Education

**B.S. Information Technology**, University of the Punjab — 2019 – 2023

## Certifications

AI Foundations: From Developer to Orchestrator Dealer Information Systems, 2026
Certified ScrumMaster® (CSM®) Scrum Alliance, 2024
Intermediate Python DataCamp, 2025
Introduction to SQL Server DataCamp, 2024
Foundations of Project Management Google, 2023
Programming with JavaScript Meta, 2022
Business Analysis Fundamentals Microsoft, 2026
Certified Tester Foundation Level ISTQB®, 2024
Introduction to Python DataCamp, 2025
Agile with Atlassian Jira Atlassian, 2023
Version Control Meta, 2022
