SUMMARY

CSM® and ISTQB®-certified Product Quality Analyst partnering with cross-functional teams to transform complex product visions into secure, high-quality solutions. Dual expertise spanning rigorous SQA practices and strategic product discovery.

EXPERIENCE

Product Quality Analyst

Jan 2026 — Present

Perseus Group, Constellation Software

- Orchestrate the translation of high-level product vision into actionable **Epics and User Stories** within Aha! and Azure DevOps — established "Strict Quality Gates" and acceptance criteria that significantly minimized scope creep and reduced defect leakage across the development lifecycle.
- Lead **cross-functional discovery sessions** using hybrid research methodologies; leverage Quantitative Analysis (Regression, Trend, Break-even) to validate market needs — ensuring prioritization is driven by **data-backed insights** rather than intuition.
- Model complex solution architectures and business processes using **Microsoft Visio and draw.io**; proactively resolve systemic bottlenecks via SWOT and **RACI/RASCI** frameworks. 5 Whys root-cause analysis, while clarifying cross-functional ownership through
- Standardize roadmap execution through **advanced Gantt Planning** and proactive Risk & Escalation Management — directly increasing delivery predictability and stakeholder alignment across distributed teams.
- Pioneered **Microsoft Power Platform (Power Apps & Automate) and Power BI** dashboards that streamline workflows, monitor product-market fit in real-time, and validate post-launch outcomes against KPIs.

Junior SQA Analyst

Feb 2024 — Feb 2026

Contour Software (Perseus Group)

- Liaised with Product Owners to refine business requirements — ensuring seamless alignment, clarity, and **process optimization** through cross-functional collaboration.
- Created detailed **test plans** and used control flow diagrams to visualize application flows, improving test coverage and sprint execution.
- Improved development, sprint, and release processes — **enhancing delivery speed** and operational efficiency across product teams.
- Supervised execution of critical test cases within **Azure DevOps for million-dollar DMS and CRM offerings**; established a systematic approach that improved overall product performance with notable reliability increases.
- Collaborated with development teams to identify and resolve defects through **manual and automation testing**, directly increasing product reliability and client satisfaction.
- Led over **2,000+ hours of domain training sessions** for development, operations, BAs, and cross-functional teams — driving alignment, knowledge sharing, and reduced onboarding time.

SQA Trainee

Dec 2023 — Feb 2024

Contour Software

- Initiated **global UI standards documentation**, improving consistency and usability across the enterprise product suite.
- Gained deep **domain, business, and sprint process** understanding, proactively identifying and enhancing workflow inefficiencies.

- Conducted **UAT, functional, API, and cross-platform testing**, ensuring system stability and meeting customer needs throughout the sprint lifecycle.
- Implemented workarounds, reduced testing efforts, tracked and managed bug reports — ensuring **timely resolution** and maintaining high product quality.
- Spent **360+ hours collaborating** with operations, development, cross-functional teams, PO, and Initiative Manager — driving quality improvements and process efficiency.

WordPress Designer

Sep 2022 — Mar 2023

Media Solutions

- Designed and customized **WordPress themes** to client specifications — delivering unique websites that enhanced user engagement and strengthened brand identity.
- Converted **PSD designs into fully functional WordPress sites**, ensuring pixel-perfect design integrity and seamless design-to-development handoff.
- Utilized **Elementor** to create responsive, dynamic, and mobile-friendly pages — improving user experience and reducing bounce rates.
- Enhanced **UI/UX** by optimizing site navigation and layout, resulting in increased user satisfaction and measurable engagement improvements.

UX Designer (Intern)

Oct 2021 — Dec 2021

Arfa Software Technology Park

- Conceptualized and crafted visually appealing **e-brochures and marketing materials** that enhanced brand visibility and professional communication.
- Refined and optimized the **web interface design**, resulting in a more intuitive and user-friendly experience with improved navigation and aesthetics.
- Sketched and prototyped **user interface designs** to streamline the design process — ensuring alignment with user needs and smoother development handoff.
- Collaborated on **design** key **improvements** applying user-centred design principles, resulting in tangible enhancements to the overall user experience.

EDUCATION

B.S. Information Technology

Nov 2019 — Dec 2023

University of the Punjab, Lahore

CORE SKILLS

Product Discovery · User Story Writing · Azure DevOps · Power BI · SQL · Python · Scrum (CSM®) · ISTQB CTFL · Stakeholder Mgmt · RACI/RASCI · Risk Management · Power Platform · Selenium · Kanban · SWOT · 5 Whys
