Product Quality Analyst (CSM®, CTFL) · Perseus Group, Constellation Software

SUMMARY

CSM® and ISTQB®-certified Product Quality Analyst partnering with cross-functional teams to transform complex product visions into secure, high-quality solutions. Dual expertise spanning rigorous SQA practices and strategic product discovery.

EXPERIENCE

Product Quality Analyst

Jan 2026 — Present

Perseus Group, Constellation Software

- Orchestrate the translation of high-level product vision into actionable Epics and User Stories within Aha! and Azure DevOps — established "Strict Quality Gates" and acceptance criteria that significantly minimized scope creep and reduced defect leakage across the development lifecycle.
- Lead cross-functional discovery sessions using hybrid research methodologies; leverage Quantitative Analysis (Regression, Trend, Break-even) to validate market needs — ensuring prioritization is driven by data-backed insights rather than intuition.
- Model complex solution architectures and business processes using Microsoft Visio and draw.io; proactively resolve systemic bottlenecks via SWOT and 5 Whys root-cause analysis, while clarifying cross-functional ownership through RACI/RASCI frameworks.
- Standardize roadmap execution through advanced Gantt Planning and proactive Risk & Escalation Management — directly increasing delivery predictability and stakeholder alignment across distributed teams.
- Pioneered Microsoft Power Platform (Power Apps & Automate) and Power BI dashboards that streamline workflows, monitor product-market fit in real-time, and validate post-launch outcomes against KPIs.

Junior SQA Analyst

Feb 2024 — Feb 2026

Contour Software (Perseus Group)

- Liaised with Product Owners to refine business requirements — ensuring seamless alignment, clarity, and process optimization through cross-functional collaboration.
- Created detailed test plans and used control flow diagrams to visualize application flows, improving test coverage and sprint execution.
- Improved development, sprint, and release processes — enhancing delivery speed and operational efficiency across product teams.
- Supervised execution of critical test cases within Azure DevOps for million-dollar DMS and CRM offerings; established a systematic approach that improved overall product performance with notable reliability increases.
- Collaborated with development teams to identify and resolve defects through manual and automation testing, directly increasing product reliability and client satisfaction.
- Led over 2,000+ hours of domain training sessions for development, operations, BAs, and cross-functional teams — driving alignment, knowledge sharing, and reduced onboarding time.

SQA Trainee

Dec 2023 — Feb 2024

Contour Software

- Initiated global UI standards documentation, improving consistency and usability across the enterprise product suite.
- Gained deep domain, business, and sprint process understanding, proactively identifying and enhancing workflow inefficiencies.
- Conducted UAT, functional, API, and cross-platform testing, ensuring system stability and meeting customer needs throughout the sprint lifecycle.
- Implemented workarounds, reduced testing efforts, tracked and managed bug reports — ensuring timely resolution and maintaining high product quality.
- Spent 360+ hours collaborating with operations, development, cross-functional teams, PO, and Initiative Manager — driving quality improvements and process efficiency.

WordPress Designer

Sep 2022 — Mar 2023

Media Solutions

- Designed and customized WordPress themes to client specifications — delivering unique websites that enhanced user engagement and strengthened brand identity.

- Converted PSD designs into fully functional WordPress sites, ensuring pixel-perfect design integrity and seamless design-to-development handoff.
- Utilized Elementor to create responsive, dynamic, and mobile-friendly pages — improving user experience and reducing bounce rates.
- Enhanced UI/UX by optimizing site navigation and layout, resulting in increased user satisfaction and measurable engagement improvements.

UX Designer (Intern)

Oct 2021 — Dec 2021

Arfa Software Technology Park

- Conceptualized and crafted visually appealing e-brochures and marketing materials that enhanced brand visibility and professional communication.
- Refined and optimized the web interface design, resulting in a more intuitive and user-friendly experience with improved navigation and aesthetics.
- Sketched and prototyped user interface designs to streamline the design process — ensuring alignment with user needs and smoother development handoff.
- Collaborated on key design improvements applying user-centred design principles, resulting in tangible enhancements to the overall user experience.

EDUCATION

B.S. Information Technology

Nov 2019 — Dec 2023

University of the Punjab

CORE SKILLS

Product Discovery · User Story Writing · Azure DevOps · Power BI · SQL · Python · Scrum (CSM®) · ISTQB CTFL · Stakeholder Mgmt · RACI/RASCI · Risk Management · Power Platform · Selenium · Kanban · SWOT · 5 Whys
